

November 26, 2020

My dearest beloved brethren, Greetings of Peace... Have a nice day.

May the LORD GOD continually blessed you, good health, and have a long life always.

Before anything else, I will give first a verse which was located on

King James Version Proverbs 12:2 and 22. In Proverbs 2 it was stated that "A good man obtain favor in the Lord but a man of wicked devices he will condemn," and also in Proverbs 12: 22 "Lying lips are abomination to the Lord, but they that deal truly are his light."

By the way, in response to your letter my dear brethren I'm very much thankful. Praise the LORD amen.

For me, as teacher in the fourth grade, first thing to do is, I will give a clear instruction to the parents how they are going to answer in all subjects before giving the modules and worksheets.

In addition of instructing the parents their must also monitoring everyday by means of calling through using cellphone. For me, since I have 21 students I divide the time for my student's morning and afternoon session. In the morning I will call 11 students, then in the afternoon I will call 10 students a total of 21 students. I will call them one by one through using cellphone everyday with my 21 students explaining and discussed the lesson, stories which was found on the modules and worksheets that I gave, printed in the bond paper, so that the students easy to understand the lesson, stories given by the teacher. So in connection with this situation, the students did not find difficult in answering their worksheets and modules because the students can asked questions by their teacher through calling cellphone every day. So, at that moment there must be an interaction between the teacher and the student. That's why I always monitor my students every day for their success. So, there's no reason that the student they don't understand the lesson, the stories especially in values education which is the word of GOD.

On the other hand, we have also daily checking of attendance of the students by means of calling through using cellphone as I mentioned above with in fact is not so easy to handled or teach distance teaching so we will pray one another our situation that we face now that we back our situation to normal.

I would like to thanks also ma'am Merlinda for always, sharing, inspiring us the word of God for being model in this school because of being faithful in serving God.

On the other part, sometimes if the parent cannot get their modules and worksheets in the school because the other kid was ill, I went into their house just to give their modules and worksheets but the teacher are not allowed to teach in the house of the student because of the health protocols.

Thank you to all brethren for your grateful heart, that you are chosen me as teacher in this school, and it was a very big help for my family.

Again God bless you all, more power and blessings from the Lord.

Loving you always,

  
HELEN G. ESITO
